

Put A Bow On It

After an amazing year filled with new model launches, industry awards, and dozens of boats sold, the HH Catamarans team is finishing out the year strong and looking forward to the many exciting developments on the horizon in 2024. We want to extend a huge thank you to all of the owners, prospects, industry partners and friends who've been a part of our journey this year.

HH44 Takes Top Honors

We are thrilled to announce that the HH44 has been named Sailing World Magazine's 2024 Boat of the Year. Judges Chuck Allen, Greg Stewart and Mike Ingham deemed the HH44 "sheer performance perfection from the top of the rig to the innovative application of hybrid eco-drives". They unanimously agreed that the HH44 is a serious sailor's dream boat, "a sophisticated crossover catamaran built to go off the grid and point to point."

The HH44 has also been awarded *Breakthrough Launch of the Year* in the

prestigious International Boating Industry/METSTRADE Boat Builders Awards. The awards recognize the year's most innovative and impactful industry initiatives. The HH44 was regarded by the judges to be a true market disruptor, "It's hard to create new niche markets in an already busy arena, but HH Catamarans is doing just that with its high-performance sailing catamarans."

The HH44 also received high praise in Cruising World's Boat of the Year competition, being awarded *Judges' Special Recognition*. The judges were blown away by the many innovations and clever details found throughout the boat, and their takeaway from their brief time onboard was that "the HH44 is the future, pushing the envelope in performance under sail and propulsion under power, on multiple levels."

Production Rolling In Cebu

HH has been working behind the scenes this past year to double our HH44 production capacity. We now have two sets of molds in our Cebu factory and have been able to bring lead times forward by over a year as a result. 36 of these special, award-winning 44s have been sold, and Hull 37 is set to commence production in August. Meanwhile we have recently shipped our HH52 molds to the new factory where we will begin production of HH52-10 in May. With plenty of room for expansion, we are happy to now be able to offer shorter lead times and earlier launch dates. To learn more about the next available hull timing and lock in 2023 pricing, contact our sales team today.

New Year Launches

We are excited to be kicking off 2024 with several new boat launches: the newest HH50-OC, HH60-02, and of course, the highly anticipated HH44-03. Follow the launch of the Wynns' HH44 CURIOSITY on their YouTube channel, [Gone With the Wynns](#), and stay tuned to HH Catamarans' social channels to see all the on-water action from the growing fleet.

HH Team Grows

As the on-water fleet continues to grow, so too does the HH Catamarans team. East Coast-based Allison Nelder recently joined the HH After-Sales

Service Team and will be leading the Warranty Department. Allison's extensive industry experience and expertise in managing complex project management software make her a valuable addition to the team. Allison joins newly-recruited captains Bridget Shear, Ben Wright, Kyle Hubley and Ben Galloway, who've recently come aboard to assist with our growing commissioning and after-sales support needs. As HH grows, our objective is to offer the highest level of customer service with the right systems and personnel in place to quickly prioritize, track, and bring warranty concerns to resolution.

Looked at differently

HH Catamarans is on a mission to redefine the concept of a luxury performance multihull... from 44ft all the way up to superyacht size

When HH44, the Catamarans brand's first entry-level luxury performance catamaran, was introduced to the market, it was a game-changer. It redefined the concept of a luxury performance catamaran, from 44ft all the way up to superyacht size. It was a game-changer because it was the first catamaran to offer the performance and luxury of a superyacht at a price point that was accessible to a much wider audience. It was a game-changer because it was the first catamaran to offer the performance and luxury of a superyacht at a price point that was accessible to a much wider audience.

HH44 has already become a disruptive force in the market

HH In The Press

We were thrilled to welcome a jury of 12 European journalists onboard the HH44 for the European Yacht of the Year testing in Barcelona in October. Immediately following the testing we hosted additional members of the media for a day of sailing, and are happy to report that the first several reviews are popping up in the international yachting press. Check out these fantastic articles from [Seahorse](#) (UK), [Wave](#) (Switzerland) and [Voile et Moteur](#) (France), and stay tuned for more from the European Yacht of the Year judges!
